Retrofitting Existing Buildings to Improve Sustainability ... Since buildings consume a significant amount of energy (40 percent of the nation's total U.S. energy consumption), particularly for heating and cooling (32 percent), and because existing buildings comprise the largest segment of the built environment, it is important to initiate energy conservation retrofits to reduce energy consumption and the cost of heating, cooling, and lighting buildings. But conserving energy is not the only reason for retrofitting existing buildings. Retrofitting of Buildings for Energy Conservation - Biblio.com Save on ISBN 9780131483705. Biblio.com has Retrofitting of Buildings for Energy Conservation by Milton Meckler and over 50 million more used, rare, and out. Retrofitting of commercial, institutional, and industrial ... The retrofitting techniques in this manual can cut energy consumption by up to 50%. The authors provide ways to project results of energy-saving measures, evaluate utility rates, and perform pre- and postconstruction surveys.
